TelsyInTouch
Communication Security

Telsy
A TIM ENTERPRISE BRAND

In response to the growing need for secure communications via mobile devices, Telsy's InTouch solution enables users to share sensitive and critical information without the need to trust a third party.

Security and usability without compromise

TelsyInTouch, is an innovative integrated secure collaboration solution that consists of two distinct interoperating elements:
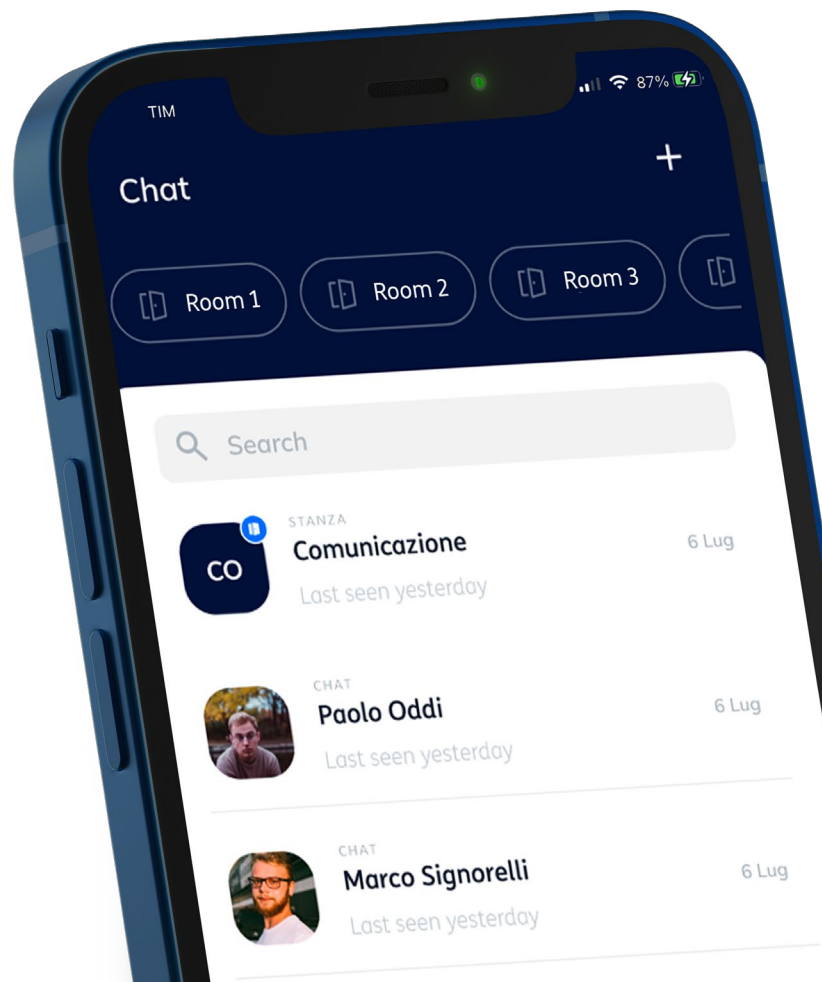

TelsyInTouch^App
A secure instant messaging app that provides a user experience similar to traditional commercial devices, with high audio and video quality thanks to advanced codecs. Available for both Android and iOS, the InTouch app uses E2EE for chat, VoIP calls and audio conferencing.

TelsyInTouch^Phone
Kernel-level configured Common Criteria certified latest generation smartphones for maximum COMSEC and CIS security. They provide only the functionalities
that meet the customer's requirements, minimising the device's attack surface to ensure its security and confidentiality.

Why **Telsy**InTouch?

- *End-to-End Encryption*

- *Proprietary TelsyGuard VPN*

- *Compatibility with iOS and Android operating systems*

- *Certified authentication*

- *On premise infrastructure*

- *Intuitive user experience*

- *Possibility to communicate with users outside the infrastructure*
