

Cyber Threat Intelligence

Managed Detection
& Response - iSOC

Today's organisations operate in unpredictable settings and must deal with increasingly complex, interrelated and invasive phenomena.

Telsy's Cyber Threat Intelligence provides timely analysis and validation of relevant information, supporting security teams in implementing the most effective defence strategies.

Four services for an advanced CTI

Company Threat Intelligence

Reporting on potential vulnerabilities and data breaches related to corporate domains

Early Warning

Regular reports concerning hardware and software vulnerabilities

Threat Investigation

Investigation into anomalies or artefacts reported by the customer

Cyber Threat Intelligence Feed

Information about ongoing attack campaigns to support security teams and incident responders

Telsy's Threat Intelligence pluses

- A **shorter time** to detect threats and vulnerabilities
- A **reduction of risk and costs** when dealing with an incident's aftermath
- **Clarity** about the **real adversaries**, what they are looking for and how they could compromise your network and your business
- **Proximity** to the customer and **ongoing support**
