TelsySkills

Cyber Professional Services
Cyber Awareness & Training

Telsy

A TIM ENTERPRISE BRAND
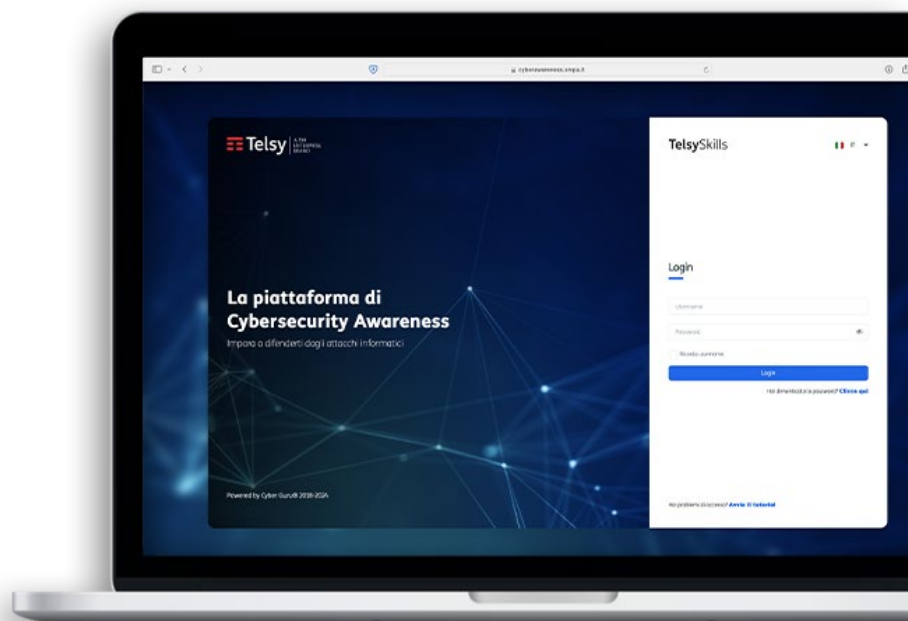

The human factor plays a major role in making businesses worldwide vulnerable. Employees may take cybersecurity requirements too lightly, leading to dramatic consequences for the organizations they work for.
Traditional training techniques have shown clear limitations in their effectiveness. TelsySkills is a unique and effective proposal to counter cybercrime, focusing on the human factor as the key to success.

Train employees to act as first line of defense against cybercrime

TelsySkills increases employee awareness by adopting the most advanced learning techniques. The platform consists of three learning modules:

Awareness
A dynamic, stimulating and interactive learning path to improve employees awareness of web tools.

Channel
A series of short videos on cyber risks with innovative, engaging and immersive storytelling.

Phishing
Experiential training with simulated, distinctive and tailor-made phishing campaigns. The platform processes a gradual increase in the difficulty of the subsequent attack simulations.

Why **Telsy**Skills?
